Content

Following the I Workshop on Heritage Stones in Salamanca in October 2018, Torino (Politecnico and University) will host the **II International Workshop on Heritage Stones 2020**, supported by the **IUGS Heritage Stone Sub commission**. Three days of seminars, round tables and field trips will be organized to promote the heritage stones and their proper preservation, thanks to the participation of scientific experts and young researchers. Oral presentations will be selected by the scientific committee among the received abstracts. A poster session on Heritage Stones and related issues is included in the program.
